Website Vulnerability Scanner Report

✔ https://coincious-smart-expense.vercel.app/chatbot

The Light Website Scanner didn't check for critical issues like SQLi, XSS, Command Injection, XXE, etc. Upgrade to run Deep scans with 40+ tests and detect more vulnerabilities.

Summary

Overall risk level:
Low

Risk ratings:

Critical:	0
High:	0
Medium:	0
Low:	4
Info:	35

Scan information:

Start time:	Nov 29, 2025 / 04:01:50 UTC+0530
Finish time:	Nov 29, 2025 / 04:02:25 UTC+0530
Scan duration:	35 sec
Tests performed:	39/39
Scan status:	Finished

Findings

Missing security header: Content-Security-Policy

port 443/tcp

CONFIRMED

URL	Evidence
https://coincious-smart-expense.vercel.app/chatbot	Response does not include the HTTP Content-Security-Policy security header or meta tag Request / Response

Details

Risk description:
The risk is that if the target application is vulnerable to XSS, lack of this header makes it easily exploitable by attackers.

Recommendation:
Configure the Content-Security-Header to be sent with each HTTP response in order to apply the specific policies needed by the application.

References:
https://cheatsheetseries.owasp.org/cheatsheets/Content_Security_Policy_Cheat_Sheet.html
https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Content-Security-Policy

Classification:
CWE : CWE-693
OWASP Top 10 - 2017 : A6 - Security Misconfiguration
OWASP Top 10 - 2021 : A5 - Security Misconfiguration

Missing security header: Referrer-Policy

port 443/tcp

CONFIRMED

URL	Evidence
https://coincious-smart-expense.vercel.app/chatbot	Response headers do not include the Referrer-Policy HTTP security header as well as the <meta> tag with name 'referrer' is not present in the response. Request / Response

Details

Risk description:
The risk is that if a user visits a web page (e.g. "http://example.com/pricing/") and clicks on a link from that page going to e.g. "https://www.google.com", the browser will send to Google the full originating URL in the `Referer` header, assuming the Referrer-Policy header is not set. The originating URL could be considered sensitive information and it could be used for user tracking.

Recommendation:
The Referrer-Policy header should be configured on the server side to avoid user tracking and inadvertent information leakage. The value `no-referrer` of this header instructs the browser to omit the Referer header entirely.

References:
https://developer.mozilla.org/en-US/docs/Web/Security/Referer_header:_privacy_and_security_concerns

Classification:
CWE : CWE-693
OWASP Top 10 - 2017 : A6 - Security Misconfiguration
OWASP Top 10 - 2021 : A5 - Security Misconfiguration

Missing security header: X-Content-Type-Options

CONFIRMED

port 443/tcp

URL	Evidence
https://coincious-smart-expense.vercel.app/chatbot	Response headers do not include the X-Content-Type-Options HTTP security header Request / Response

Details

Risk description:
The risk is that lack of this header could make possible attacks such as Cross-Site Scripting or phishing in Internet Explorer browsers.

Recommendation:
We recommend setting the X-Content-Type-Options header such as `X-Content-Type-Options: nosniff` .

References:
https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/X-Content-Type-Options

Classification:
CWE : CWE-693
OWASP Top 10 - 2017 : A6 - Security Misconfiguration
OWASP Top 10 - 2021 : A5 - Security Misconfiguration

Server software and technology found

UNCONFIRMED

port 443/tcp

Software / Version	Category
Lucide	Font scripts
React	JavaScript frameworks
React Router 6	JavaScript frameworks
Vercel	PaaS
Vite	Miscellaneous
HSTS	Security

Details

Risk description:
The risk is that an attacker could use this information to mount specific attacks against the identified software type and version.

Recommendation:
We recommend you to eliminate the information which permits the identification of software platform, technology, server and operating system: HTTP server headers, HTML meta information, etc.

Fingerprint_Web_Server.html

Classification:
OWASP Top 10 - 2017 : A6 - Security Misconfiguration
OWASP Top 10 - 2021 : A5 - Security Misconfiguration

Website is accessible.

Nothing was found for vulnerabilities of server-side software.

Nothing was found for client access policies.

Nothing was found for robots.txt file.

Nothing was found for absence of the security.txt file.

Nothing was found for use of untrusted certificates.

Nothing was found for enabled HTTP debug methods.

Nothing was found for enabled HTTP OPTIONS method.

Nothing was found for secure communication.

Nothing was found for directory listing.

Nothing was found for passwords submitted unencrypted.

Nothing was found for error messages.

Nothing was found for debug messages.

Nothing was found for code comments.

Nothing was found for missing HTTP header - Strict-Transport-Security.

Nothing was found for passwords submitted in URLs.

Nothing was found for domain too loose set for cookies.

Nothing was found for mixed content between HTTP and HTTPS.

Nothing was found for cross domain file inclusion.

Nothing was found for internal error code.

Nothing was found for HttpOnly flag of cookie.

Nothing was found for Secure flag of cookie.

Nothing was found for login interfaces.

Nothing was found for secure password submission.

Nothing was found for sensitive data.

Nothing was found for unsafe HTTP header Content Security Policy.

Nothing was found for OpenAPI files.

Nothing was found for file upload.

Nothing was found for SQL statement in request parameter.

Nothing was found for password returned in later response.

Nothing was found for Path Disclosure.

Nothing was found for Session Token in URL.

Nothing was found for API endpoints.

Nothing was found for emails.

Nothing was found for missing HTTP header - Rate Limit.

Scan coverage information

List of tests performed (39/39)

- Test initial connection
- Scanned for missing HTTP header - Content Security Policy
- Scanned for missing HTTP header - Referrer
- Scanned for missing HTTP header - X-Content-Type-Options
- Scanned for website technologies
- Scanned for version-based vulnerabilities of server-side software
- Scanned for client access policies
- Scanned for robots.txt file
- Scanned for absence of the security.txt file
- Scanned for use of untrusted certificates
- Scanned for enabled HTTP debug methods
- Scanned for enabled HTTP OPTIONS method
- Scanned for secure communication
- Scanned for directory listing
- Scanned for passwords submitted unencrypted
- Scanned for error messages
- Scanned for debug messages
- Scanned for code comments
- Scanned for missing HTTP header - Strict-Transport-Security
- Scanned for passwords submitted in URLs
- Scanned for domain too loose set for cookies
- Scanned for mixed content between HTTP and HTTPS
- Scanned for cross domain file inclusion
- Scanned for internal error code
- Scanned for HttpOnly flag of cookie
- Scanned for Secure flag of cookie
- Scanned for login interfaces
- Scanned for secure password submission
- Scanned for sensitive data
- Scanned for unsafe HTTP header Content Security Policy
- Scanned for OpenAPI files
- Scanned for file upload
- Scanned for SQL statement in request parameter
- Scanned for password returned in later response
- Scanned for Path Disclosure
- Scanned for Session Token in URL
- Scanned for API endpoints
- Scanned for emails
- Scanned for missing HTTP header - Rate Limit
